

The long awaited *HeatCalibur*[™] is now available. This revolutionary new tool will test virtually all heat detectors: RoR, Fixed Temp and Pencil Style. Up to 90 test per hour and Li-Ion Batteries make this Heat Detector Tester the superior choice for professionals everywhere.

Features:

- Lightweight, easy to use, this unit weights under 3lbs (under 2lbs when only one battery is used)
- UL Listed Li-Ion Batteries – up to 90 test per fully charged battery
- Designed to test RoR, Fixed Temp and Pencil Style Heat Detectors in the full range of 135° to 225°F
- Easy to Read Digital LED Readout
- Uses the Versa-Tools line of extension poles
- Includes rugged hard shell storage case
- 1 year Manufacturers Warranty and up to 3 years additional Extended Warranty available.
- UL/ULC Listed

“Heat Ascension Technology” this technology presents the heat in a rising fashion to emulate the rising effect of heat in a real fire situation. **“EverCool”** engineering was used in designing to provide a safe, cool surface, at all times.

Bright LED Gauge displays the temperature the detector responded at, the settings and the battery life. Saves the Technician time and resources.

Pre-Test Guide, Allows user to choose the test type, test mode and temp range for the most accurate testing available.

HC Power – 25.9v 1.5Sh Li-Ion Batteries

HeatCalibur™ is designed to work with both batteries or one battery at a time. When weight is an issue, the HeatCalibur is the answer.

2 Batteries will produce 90+ tests.
1 Battery will produce approximately 35 to 40 tests.

Battery Charger is a 19v 2.75a Charger with a DC Car Charging adapter.
